BBC Editorial Notes

1. Reference is made to the editorial note at the end of Brace's 090712 Bratislava Czechoslovak Home Service 090105 stating "BBC informs that this is the first monitored mention of Polish Czechoslovak joint operation of transport systems and power production".

2. It is desired to encourage the inclusion of such BBC observations, which are of value to FBIB. It is requested, however, that the source be particularized and so quoted as to admit of reservations, e.g. "BBC monitor believes that ..." or "BBC wire states that ...". In the reference case, several previous monitored statements of joint Polish-Czechoslovak operation of transport and power systems are on file.
